

JACOB OLUWASESAN ADEBAYO

Software Developer

+234 813 455 7536 | jacobadebayo.ja@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFILE SUMMARY

Software Developer specializing in designing and optimizing scalable web and mobile applications. Proficient in microservices architecture, serverless computing, and data structures. Experienced in enhancing application performance, security, and scalability through agile methodologies to drive user engagement and operational efficiency.

SKILLS

- **Languages:** Java, JavaScript, Typescript, SQL.
- **Frameworks:** React, Next.js, React Native, Node.js, Express.js, Spring Boot.
- **UI & Animation:** GSAP, Framer Motion, Three.js, React Three Fiber.
- **Databases:** MongoDB, PostgreSQL, Supabase, Appwrite, Redis, Amazon RDS, DynamoDB.
- **Deployment & CI/CD:** Docker, Vercel, Netlify, Render, AWS.
- **Testing:** Jest, JUnit 5.
- **Tools:** Prisma, VS Code, IntelliJ, Postman, Android Studio, Trello, Jira, Slack.
- **Soft Skills:** Teamwork, Communication, Analytical & Critical Thinking, Project Management.

EXPERIENCE

Full Stack Engineer (Remote, Nigeria)

TraderApp

March 2024 - Present

- Developed a real-time asset price streaming feature for the user dashboard using Web Sockets, Redis and the Binance API, improving trade execution and monitoring speed.
- Designed a trade signals tracking system to accurately calculate and reward users for earned profits, increasing transaction accuracy by 41%.
- Boosted new registrations by 33% and increased active users by 74% by implementing a gamified task and reward system.
- Implemented automated unit testing with Jest, reducing deployment bugs by 55% and improving system reliability.

Software Developer (Remote, Nigeria)

Qim Invest

June 2022 – March 2024

- Increased revenue by 7% and traffic by 24% by deploying a new website optimized with search engine optimization (SEO) strategies and meta-tagging.
- Enhanced API performance by 20% by optimizing query efficiency and database structuring in Node.js/Express.
- Strengthened security by implementing JWT-based authentication and cookie-based access control, reducing unauthorized access incidents.
- Reduced system failures by 35% with automated unit testing with Jest, ensuring data integrity.

PROJECTS

- **OneClick Finance ([Link](#)):** Engineered a financial management app with Plaid and Dwolla integration, facilitating seamless multi-account transactions and reducing dependency on multiple banking apps.
 - Technologies: Next.js, Typescript, ShadCN, Tailwind CSS, Chart.js, Appwrite, Plaid, Dwolla, Sentry.
- **CarePlus+ ([Link](#)):** Developed a healthcare self-management system that streamlines medical appointment scheduling, reducing patient wait times and optimizing physician availability.
 - Technologies: Next.js, Typescript, ShadCN, Tailwind CSS, Appwrite, Twilio, Sentry.
